

## Spectacular Scenic Helicopter Transfer to Royal Belize

Royal Belize Island is a spectacular 7 ½ acre private island south east Dangriga Town. This pristine private island lays a minute away from the largest barrier reef in the western hemisphere. What better way to get there than by a thrilling sight-seeing helicopter transfer from the Belize International Airport to the Royal Belize.

There are **two** different routes to choose from in the transfer from the Belize International Airport to Royal Belize. The options are as follows:

### Option 1: Reef Transfer to Royal Belize (Blue Route)

As you depart from the Belize International Airport your flight takes you directly to the exotic views of Belize's coastline. As you past Robinson Point soak up the ambiance of the Caribbean Sea as you head to the world's second largest reef system, Belize's Great Barrier Reef. Stretching for more than 185 miles along the coast and extending 50 miles offshore, the barrier reef is a true treasure among the coral reef communities of the Caribbean. Be one of the lucky passengers to view a manatee either sun-bathing or just taking a swim along the

Cayes. Also keep your eyes open as you look closely at the clear waters as you might see a dolphins, sting rays or sharks in the water as you soar high above the reef.

The helicopter transfer will reduce your arrival time from the Belize International Airport to Royal Belize Island significantly by up to 3 hours. As your flight continues you will have an incredible view of cayes such as Columbus Caye, Cross Caye, and Tobacco Caye among others en-route, you will marvel at the vistas seen only by few! Your flight comes to an end as you arrive at you're final destination – Royal Belize.

## **Option 2: Belize City, Reef & Blue Hole Flight Transfer to Royal Belize (Red Route)**

After you board the helicopter and start your journey, the flight takes you to view the beautiful City of Belize. It's just like a land tour of the city only you get to see more from the air. The flight out of Belize City will take you directly across into the cayes that borders the Barrier Reef. The flight will then continue along the coast line of the Reef passing over Cayes like Swallow Caye, where you will be able to see Manatees swimming around; Gallows Point, Spanish Lookout Caye, Water Caye and Goff's Caye. Open your ears as the music of the waves take you far away into a relaxation zone. Keep your eyes open too; you may be one of the lucky few who get to see sharks, dolphins, sting rays, manatees or crocodiles along the way.

Not further along will be the beautiful view of Turneffe Islands the very Atolls upon which Turneffe Island Resort is located. Turneffe Island is the largest of the three Atolls located in Belize stretching 30 miles long and 10 miles wide. The flight enters over the north of the Island at Snake Pt., then you will enter the Central Lagoon where you will fly over many small cayes before reaching the Northern Bogue and the east end of Turneffe Islands. At the atolls, there are about 200 cayes that are covered by mangroves. The Turneffe Islands are home to

many exotic marine animals the more popular of those are the eagle rays, playful dolphins, turtles, huge green morays, giant Jew fish, nurse sharks, reef sharks, grouper, snapper and hose-eye jacks.

The adventure continues as you venture into the open ocean continuing south-east heading towards the Lighthouse Reef Atoll, beyond the barrier en route to the one of a kind Blue Hole. The Blue Hole is the largest ocean sinkhole in the world, created by a collapsed underground cavern, hence giving the appearance of a dark blue circle amidst the turquoise sea. The Blue Hole measures 1,000 ft in diameter and 460 feet in depth. It is located approximately 60 miles west from Belize City and in March of 1996 it was declared a World Heritage Site and later declared a National Monument in February of 1999.

Passing inside the Lighthouse Reef you will now see the great Blue Hole surrounded by hard reef that borders it with only two small channels breaking into it. As you go across this spectacular hole, you will be dazzled by its size and color. As you continue to soar in the sky, the flight will take you over one of Belize's largest protected areas, Half Moon Caye Natural Monument which encompasses 10,000 acres of atoll and 15 square miles of surrounding areas.

Your journey comes to an end as we head back to the main reef entering by Tobacco Caye en-route, you will marvel at the vistas seen only by few! Your flight comes to an end as you arrive at you're final destination – Royal Belize.
